R01-19-A-004
Office of the TOWN MANAGER
MICHAEL MANISCALCO, MPA
mmaniscalco@easthamptonct.gov

To Whom It May Concern:

On behalf of the Town of East Hampton and the East Hampton Brownfields Redevelopment Agency, I'm pleased to submit this application for a US EPA Brownfields Assessment Grant. Since at least 2003, East Hampton has taken an active role in putting our historical Brownfield properties back into productive reuse. No better example can be seen than to drive through our Village Center at the crossroads of Main Street and Summit Street. We made a commitment decades ago to turn this once vibrant area, with bustling mills and industrious bell makers, back into an economically viable town center that we can once again be proud of. The area has been held back by unknown environmental conditions, and absentee property owners. However, there has been a strong resurgence of small business entrepreneurs flocking back to the Village Center over the past few years. Small shops such as The Black Walnut Artisan Bread Company, ECO Coffee House, among several others, have brought a sense of community and pride back to this area, along with its economic benefits. With this Brownfields Assessment Grant, we seek to continue this wave of redevelopment – a true revival for our small New England town. Please find the below information in accordance with the grant application:

TOWN COUNCIL

Melissa Engel
Chairperson

Mark Philhower
Vice Chairman

Peter Brown

1. Application Identification: Town of East Hampton
20 East High Street
East Hampton, Connecticut 06424

2. Funding Requested
 - a. Assessment Grant Type: Community-wide
 - b. Federal Funds Requested:
 - i. \$200,000
 - c. Contamination: Hazardous Substances (\$200,000)

3. Location: East Hampton, Middlesex County, Connecticut

4. Property Information for Site-Specific Proposals:
Priority Site for Community Wide: Former Clark & Watrous Company
1 Watrous Street
East Hampton, Connecticut 06424

5. Contacts
 - a. Project Director: Jeff Jylkka
Finance Director
Town of East Hampton
20 East High Street
East Hampton, Connecticut 06424
(860) 267-7548
jjylkka@easthamptonct.gov

b. Chief Executive/Highest Ranking Elected Official:

Mike Maniscalco
 Town Manager
 East Hampton Town Hall
 20 East High Street
 East Hampton, Connecticut 06424
 (860) 267-4468
 mmaniscalco@easthamptonct.gov

6. Population: 12,959

7. Other Factors Checklist:

Other Factors	Page #
Community Population is 10,000 or less.	n/a
The applicant is, or will assist, a federally recognized Indian tribe or United States territory.	n/a
The priority brownfield site(s) is impacted by mine-scarred land.	n/a
The priority site(s) is adjacent to a body of water (i.e., the border of a priority site is contiguous or partially contiguous to the body of water, or would be contiguous or partially contiguous with a body of water but for a street, road, or other public thoroughfare separating them).	2
The priority site(s) is in a federally designated floodplain.	2
The redevelopment of the priority site(S) will facilitate renewable energy from wind, solar, or geothermal energy; or any energy efficiency improvement projects.	n/a
30% or more of the overall project budget will be spent on eligible reuse planning activities for priority brownfield site(s) within the target area.	n/a

8. Letter from the State or Trible Environmental Authority: Please find the letter from Connecticut Department of Energy and Environmental Protection included herein.

As East Hampton has been able to demonstrate over our recent past, US EPA Brownfields grant initiatives truly act as a catalyst spurring community involvement and comprehensive redevelopment of distressed communities. We have held steadfast to our vision of rebuilding our vibrant Village Center through stripping these blighted properties of their environmental unknowns. The Town, and its Brownfields Redevelopment Agency, have a proven record of successful grant management and implementation. I anticipate that you will review this grant application with favorable consideration. Please feel free to reach out to me should any questions arise, or if I can provide any additional information.

Sincerely,

Michael Maniscalco
 Town Manager

January 29, 2019

Mr. Mike Maniscalco
Town Manager
Town of East Hampton
20 East High Street
East Hampton, CT 06424

Re: State Acknowledgement Letter for EPA Brownfields Assessment Grant for FY 19

Dear Mr. Maniscalco:

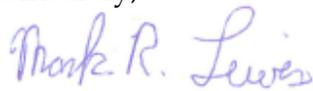

The Connecticut Department of Energy and Environmental Protection (DEEP) acknowledges that the Town of East Hampton intends apply to the US Environmental Protection Agency (EPA) for a Brownfields Assessment Grant for Federal Fiscal Year 2019. The Town of East Hampton plans to use the grant funding to conduct assessment activities at various properties contaminated with hazardous substances, including but not limited to a former mill building at 1 Watrous Street.

If petroleum assessment grant funds are awarded by EPA, DEEP or EPA must determine the eligibility of each petroleum site before any site specific assessment activity is undertaken using the petroleum assessment grant funds.

You may want to refer to DEEP's PREPARED Municipal Workbook. This on- line guidebook is designed to help municipalities navigate the complex process of remediating and redeveloping brownfields. The Workbook is available on our web site at http://www.ct.gov/deep/cwp/view.asp?a=2715&q=555770&deepNav_GID=1626.

If you have any questions about this letter, please contact me at (860) 424-3768 or by e-mail at mark.lewis@ct.gov. Good luck with your application.

Sincerely,

Mark R. Lewis
Brownfields Coordinator
Office of Constituent Affairs & Land Management

C: Ms. Dorrie Paar, EPA (via e- mail)
Mr. Jeff Jylkka, Town of East Hampton (via e- mail)

1. PROJECT AREA DESCRIPTION AND PLANS FOR REVITALIZATION

b. Target Area and Brownfields

i. Background and Description of Target Area

East Hampton, known as “the Belltown” is a historic rural town with a proud industrial past. The Town is located on the banks of the Connecticut River, an American Heritage River. The Town’s earliest history is linked to the Connecticut River with ship building being the town’s major industry in the mid-1700s. From 1800 to 1850, the Town transitioned from ship building to manufacturing and the village of East Hampton became an industrial center in the Northeast. By the late 1800s East Hampton was manufacturing millions of sleigh bells, providing over 90% of the world’s market. East Hampton’s “Village Center” was also home to other major manufacturers of the time such as the Summit Thread Company and Artistic Wire Company.

The effects of East Hampton’s industrial past are still impacting the Town today. For many years industrial activity in and around the Town’s Village Center resulted in raw sewage and industrial waste being directly discharged into the soil and watersheds. Particularly impacted was Pocotopaug Creek, which provided power to many of the old factories in the Village Center. The creek runs through the Village Center and eventually to the Salmon River in the area of Machimoodus State Park. The Salmon River is a major tributary to the Connecticut River and has a drainage basin area of 96,000 acres. The Salmon River meets the Connecticut River in East Haddam at the Silvio O. Conte National Wildlife Refuge. The impacts to Pocotopaug Creek from the Village Center Brownfield properties continues to this day although the Town’s efforts in site assessment and remediation made possible by past EPA and State environmental grants have succeeded in eliminating some of the impacts.

Today the Town’s scenic Main Street runs through the former industrial center. The Town’s post office, library, senior center, a school, a historical museum and several shops, restaurants and other small businesses are located in the Village Center. In the past year, the Village Center has experienced a mini-revival with some modest increase in economic activity with several new businesses opening. This increased economic activity has been in part spurred on by the efforts of the Brownfield Redevelopment Agency and the Town’s recent establishment of the Tax Incremental Financing (TIF) district.

While the Town has made progress in laying the groundwork for thoughtful, sustainable development in the Village Center, blighted properties like the Site, left over from the Town’s industrial past remain an obstacle to further economic development and in fact have a negative effect upon the future funding made possible by the TIF district. The contamination or the threat of contamination is the major impediment to the reuse of key properties in the Village Center and is a barrier to more meaningful economic development in the area. By removing the environmental barriers to the reuse of these sites, the Town has the ability to improve the quality of life for the community by increasing local employment opportunities, diversifying the tax base and increase the social and cultural opportunities available to the community. While the Town has made progress with regard to its Brownfields in the Village Center, additional assessment work is needed to maintain this positive momentum and remediate and redevelop

additional Brownfield sites in the Village Center. Assessment work at the Site will be important to this effort.

In short, the Town and its business community have created very real economic momentum in the revitalization of the Village Center by removing both economic and environmental impediments to the productive reuse and improvement of properties, coupled with the select removal of blighted structures. The Town will continue to foster this momentum as additional funds, including grants, become available.

ii. Description of the Priority Brownfield Site(s)

Although there are several Brownfields properties within the Village Center, the Town has identified the following two high priority sites for assessment: 1 Watrous Street and 13 Summit Street. The former has been utilized for a variety of industrial and commercial practices. The Clark & Watrous Company used the property for the manufacture of bell toys, sleigh bells, and even casket trimmings. Merrick & Conanant Silk used the site for silk production. Automotive repair and wood cabinetry manufacturing have also been known to occur. Known environmental concerns at this property include a 100-gallon fuel oil release in 2001. The site was also a former RCRA Large/Small Quantity Generator of Hazardous Wastes, namely cyanide and volatile organic compounds.

Both of these two priority sites are located within the vicinity of a body of water. 1 Watrous Street, which is already owned by the Town, is located adjacent to Pocotopaug Creek, across Watrous Street. Pocotopaug Creek flows through 13 Summit Street, and is culverted beneath a portion of the mill building. Portions of both of these parcels are located within the FEMA designated 100-year floodplain (i.e., Zone A).

c. Revitalization of the Target Area

i. Redevelopment Strategy and Alignment with the Revitalization Plans

Redevelopment and revitalization of the Village Center has been the focus of the Town's economic development. In June 2018, the Town created the Tax Increment Fund (TIF) District in order to catalyze economic development through anticipated future increases in property tax revenues to generate incremental revenues to help pay for further improvements within the district. The TIF District plan includes a broad range of projects that would be eligible for use with TIF funds, including streetscape and façade improvements, infrastructure upgrades, wayfinding signage, and other improvements. The significant tax delinquency associated with 13 Summit Street, one of the priority sites, will negate some of the available funds under the TIF program and therefore it may be in the Town's interest to acquire the property. The proposed assessment activities will help inform that decision.

ii. Outcomes and Benefits of the Redevelopment Strategy

The Town anticipates that the proposed project and revitalization plans will aid in stimulating further development within the project area. The Village Center has experienced a resurgence of small businesses and restaurants flocking back with great hometown pride. Assessing, and ultimately cleaning up, the large brownfield properties, (e.g., 1 Watrous Street and 13 Summit Street) will mitigate the environmental unknowns that are currently plaguing pride in ownership and redevelopment of these parcels.

d. Strategy for Leveraging Resources

i. Resources Needed for Site Reuse

The Town of East Hampton has a Brownfields Redevelopment Agency, which successfully aids the Town in Brownfields planning, assessment, and clean-up activities. This all-volunteer organization is comprised of skilled professionals who donate their expertise to the town. The Agency is comprised of Licensed Environmental Professionals, attorneys, and a trained librarian, all of which provide countless hours of personal and professional time to the Town.

ii. Use of Existing Infrastructure

The redevelopment of the Brownfields sites in the targeted area will use the existing municipal sewers and public water system. No new roads will need to be created. East Hampton is one of the few small towns in our region that have an existing public sewer system. This will increase our ability to attract developers once the contamination is characterized and cost estimates for cleanup are completed. In addition, the Town is actively exploring options for the development of new water supplies to augment the severely limited supply of water available from the Town operated Village Water System.

2. COMMUNITY NEED AND COMMUNITY ENGAGEMENT

a. Community Need

i. The Community's Need for Funding

East Hampton has a population of 12,959 and a per capita income of \$43,358 which is slightly lower than that of Middlesex County; the Town's poverty rate is 5.6%. The median sale price of a single-family house is \$258,900, which is below the state and county average.

With the commercial/industrial real estate providing 5.4% of the Town's property tax income, there is a heavy tax burden on residential property owners. In addition, the Town's population continues to grow at a faster pace than the region and the state, thus straining municipal services and the school system.

Funding for assessment of Brownfields within the Village Center is necessary. The Town cannot afford to do it on its own, and remediation and redevelopment of the Site is necessary for the sustained economic health of the Village Center.

ii. Threats to Sensitive Populations

There are several facilities in and around the area that provide services to or serve as residences for several sensitive populations which include Center School, an elementary school serving 4th and 5th grade students, the East Hampton Senior Center and a diverse population in a multi-family low-income neighborhood that includes elderly residents and families with young children.

b. Community Engagement

i. Community Involvement

The Town of East Hampton Brownfields Redevelopment Agency aids the Town staff in making decisions with respect to site selection, cleanup, and future redevelopment of priority Brownfield sites.

ii. Incorporating Community Input

The Town of East Hampton has had much experience in communicating with the public about the Brownfields issues affecting their town. For this project, the Town will implement a communication plan that has proved effective in the past. Since the first Brownfields Assessment project began in 2003, there have been many public meetings and all of them have been well attended. In general, public response has been very positive as those who attended the meetings have applauded the work of the Brownfields Redevelopment Agency,

3. TASK DESCRIPTIONS, COST ESTIMATES, AND MEASURING PROGRESS

3a. Description of Tasks and Activities

Task 1- Community Outreach & Program Development- These funds will be used for programmatic costs necessary to notify the community of the proposed project and to fulfill all the necessary reporting requirements to the EPA and CTDEP. Travel funds will be used to attend EPA sponsored Brownfields conferences. Contractual funds will be used to hire the expertise necessary to effectively inform the public about Brownfields issues specific to 1 Watrous Street and its position in the Village Center Redevelopment Area. The Town will not use any of these funds for administrative purposes as prohibited by the Brownfields Law.

Task 2- Perform Phase I ESAs for the 1 Watrous Street and 13 Summit Street properties - Funds will be used to hire an Environmental Engineering firm to perform Phase I ESAs identifying potential or existing environmental contamination liabilities.

Task 3- Perform Phase II ESAs for the 1 Watrous Street and 13 Summit Street properties - Funds will be used to hire an Environmental Engineering firm to perform Phase II ESA.

Task 4- Perform a Remediation Feasibility Study on the 1 Watrous Street and 13 Summit Street properties - Funds will be used to hire an Environmental Engineering firm to perform a Remediation Feasibility Study

Task 5 – Perform Hazardous Building Material Surveys of the structures located at 1 Watrous Street and 13 Summit Street and develop cost estimates for building abatement – Funds will be used to hire an Environmental Engineering firm to perform the HBM surveys.

Task 6 – Perform a Phase III Site Investigation of the property located at 1 Watrous Street – Funds will be used to hire an Environmental Engineering firm to perform the Phase III.

Task 7 – Compile an Engineer’s Cost Opinion concerning the probable cost for selective renovation of 1 Watrous and the potential demolition of 13 Summit Street.

3b. Cost Estimates and Outputs

Budget Categories		Task 1 Community Outreach & Program Dev.	Task 2 Phase I ESAs	Task 3 Phase II ESA	Task 4 Remediation Feasibility Study	Task 5 Hazardous Building Material Surveys	Task 6 Phase III Site Invest.	Task 7 Engineer's Cost Opinion	Total
D I R E C T C O S T	Personnel	0							
	Fringe	0							
	Benefits								
	Travel	5,000							5,000
	Equipment	0							0
	Supplies	500	500						1,000
	Contractual	2,000	12,000	80,000	20,000	30,000	40,000	10,000	194,000
	Other	0							0
Total Direct Costs		7,500	12,500	80,000	20,000	30,000	40,000	10,000	200,000
Indirect Costs		0	0	0					
Total Budget		7,500	12,500	80,000	20,000	30,000	40,000	10,000	200,000

The Town of East Hampton and the East Hampton Brownfields Redevelopment Agency will together provide at least \$50,000 in in-kind services during the period of the grant.

The Town of East Hampton will track outcomes and report the findings in the EPA quarterly reports. Site-specific accomplishments will be reported on Property Profile Forms and submitted electronically to EPA's ACRES reporting system. At the end of the cooperative agreement, a final project report will be prepared. The final report will summarize accomplishments, expenditures, outcomes, outputs, lessons learned, and any other resources leveraged during the project and how they were used.

3c. Measuring Environmental Results

The Town of East Hampton will track outcomes and report the findings in the EPA quarterly reports. Site-specific accomplishments will be reported on Property Profile Forms and submitted electronically to EPA's ACRES reporting system. Task Orders will facilitate tracking work progress. Phase I and Phase II environmental site assessment reports will be produced and made available on the town's website. The property at 1 Watrous Street to be assessed is currently town-owned. The goal is to return the property to the tax rolls, ideally to be re-used and improved. The site is located at the edge of the Village Center brownfields redevelopment. The assessments conducted under a new grant will attract private developers to the area.

4. PROGRAMMATIC CAPABILITY AND PAST PERFORMANCE

a. Programmatic Capability

i. Organizational Structure

The Town of East Hampton has had extensive experience in managing State and Federal grants. East Hampton has a Town Manager/Town Council form of government that empowers the Town Manager to run the day to day operations of the Town, much like a CEO in the private sector. The Town Manager, Michael Maniscalco will lead the team in managing the EPA Brownfields Cleanup grant. Mr. Maniscalco has been the Town Manager since 2012. During his tenure, he has overseen major public works projects related to brownfields such as the removal of a water tank tower at 1 Watrous Street in March 2015. He has extensive experience in administering state and federal grants. In 2018, the town approved the building of a new Town Hall complex. Mr. Maniscalco will oversee the hiring of environmental engineers and the town staff assigned to this project.

The East Hampton Brownfields Redevelopment Agency (EHBRA), begun as the East Hampton Village Center Brownfields Committee under the Economic Development Commission in 2003, is uniquely qualified to ensure the success of the Grant implementation. In 2007 the Connecticut Chapter of the American Planning Association awarded its annual Citizen Planning Award to the Brownfields Committee. The current EHBRA consists of Connecticut Licensed Environmental Professionals (LEPs), attorneys, a banking professional, and a professionally trained librarian who serves as the Committees record keeper. Two members have been serving since the original committee was formed. The hard work and dedication of this committee was critical to the success of the Town's first Brownfields Initiative. They took the lead role in developing and implementing a community outreach plan, overseeing environmental engineering work and developing reuse plans for two sites, consistent with the desires of the community. In addition to the initial Brownfields award, the EHBRA has procured and implemented additional grants from EPA (see Table in 4.b.i) and the Connecticut Department of Economic and Community Development (DECD). Most recently (May 23, 2014) a STEAP grant of \$500,000 was awarded for the demolition of the former Summit Thread Powerhouse at 13 Watrous St. along with additional PCB contaminated soil removal. The grant has been extended to December 31, 2019 with soil removal anticipated in Spring 2019.

The pertinent and complimentary skills on the EHBRA allow them to actively manage, along with Town officials, the multiple facets of a Brownfields project including technical investigation, environmental regulations, business matters, and community outreach and communications. Jeffery Jylkka, Finance Director will manage the financial aspects of the program and the EPA reporting requirements. Dean Michelson, Director of Public Works, will oversee the day to day operations of the project, overseeing all contractors and working with property owners. The EHBRA will be responsible for the ongoing communication with all stakeholders.

ii. Acquiring Additional Resources

All contractors will be hired using standard bidding procedures in accordance with 40CFR30.40.

Bids for work will be solicited using the RFP process. The Town of East Hampton has used the RFP process for its state grants as well as mechanisms in place for utilizing pre-approved lists of contractors.

b. Past Performance and Accomplishments

i. Previously Received an EPA Brownfields Grant

Grant (#, Dates, \$)	1. Accomplishments	2. Compliance	Funds Expended
BF97183201 Assessment Community-wide 2007-2011 \$200,000	<ul style="list-style-type: none"> Limited Phase II Environmental Assessment Report (25 Skinner) Interim Remedial Action Plan (13 Watrous St) Remedial Action Plan (103 Main St) Forms for an Engineering Control Application at 103 Main Bid Documents (plans and specifications) for remediation at 103 Main St. 	Closed All quarterly reports, annual financial reports, and key measures reports are submitted to U.S. EPA Region 1 as required.	\$213,639.60

BF96131801 Assessment Oct. 1, 2010- Sep. 30, 2015 \$200,000	<ul style="list-style-type: none"> Brookside Phase II & III Brookside Remedial Action Plan Revised & updated Brownfields Inventory EH Village Center 	Closed All quarterly reports, annual financial reports, and key measures reports are submitted to U.S. EPA Region 1 as required.	\$153,638.53

The Town of East Hampton has extensive experience in procuring and administering State and Federal Funds. On the Federal level, the Town has worked with HUD, USDA, EPA, and the Army Corps of Engineers to successfully complete various public works projects. The Town of East Hampton has had no adverse audit findings. Nor has it ever been required to comply with special "high risk" terms and conditions under agency regulations implementing OMB Circular A-102. Connecticut has awarded the Town of East Hampton multiple STEAP Grants from the DECD.

The Brownfields projects have been an overwhelming success. Major accomplishments include:

- Performed Environmental Site Overview Report that identified and screened 24 Brownfields properties in the Village Center,
- Performed Phase I ESAs on three privately held properties,
- Performed Phase I & II ESAs on two Town owned properties, 103 Main Street and 13 Watrous Street,
- Performed Hazardous Material survey of the two Town owned properties,
- Performed a groundwater receptor survey,
- Consummated access agreement for Phase II ESA on one privately held property,
- Preliminary assessment of Pocotopaug Creek sediments,
- Performed Remedial Options/Cost Analysis for the two Town owned properties,
- Leveraged \$300,000 in emergency CDBG funding for improvements to the pump house at Water Tower property
- Submitted ECAFs to CTDEP for two properties
- Performed Phase II & III ESA on 1 privately held property
- Produced a Village Center Revitalization Assessment (Market Analysis Report)
- Submitted Significant Environmental Hazard Report for 13 Watrous
- Updated Sensitive Receptor Survey for 13 Watrous
- Performed a partial Phase III ESA for 13 Watrous
- Remediation of 103 Main Street and paving for a village center town parking lot
- Landscaping at 103 Main Street parking lot installed as part of an Eagle Scout project,
- Updated Brownfields documents available on the redesigned town website
- Conducted Remedial Investigation Report & Remedial Action Plan for two Town owned properties,
- Performed a Village Center Groundwater Quality Investigation
- Updated the Brownfields Inventory for East Hampton Village Center
- Continued Work at 13 Watrous Street (begun under EPA Assessment and Cleanup Grants) with additional funding from CT DECD.

The main goals of EPA's Brownfields Projects are conducting environmental assessments and developing reuse plans for Brownfields sites. However, they also act as a catalyst for community involvement and comprehensive redevelopment of distressed communities. With the help of the Environmental Protection Agency's Brownfields Program, the Town of East Hampton will continue to build upon its successes to meet the challenges of Brownfields redevelopment in the Village Center, the heart and soul of our small community.

Threshold Criteria Response

1. Applicant Eligibility

The Town of East Hampton is a General Purpose Unit of Local Government

2. Community Involvement

The Town of East Hampton knows that the most effective means of gaining community support is through local initiatives commencing early in the process. Since the award of the first Brownfields grant in 2003, the Town has had great success in rallying the community around the plans to revitalize the Village Center and Brownfields redevelopment in particular. This has been accomplished through community wide workshops, outreach to various community organizations, facilitating favorable newspaper articles, individual meetings with property owners, and updating of information on the town website. The Town will utilize these same methods that have been so successful in the past several years. The Brownfields Redevelopment Agency will build upon the success of their community outreach program and continue to seek innovative ways involve the entire community.

3. Expenditure of Assessment Grant Funds

The Town of East Hampton does not currently have an active EPA Brownfields Assessment Grant.
